Irrigation, With Solar Energy ?

Irrigation Solutions

Irrigation is the biggest growth application for solar water pumps. With the price reduction of solar modules and high efficiency pumps, solar energy makes more sense than diesel or expensive grid connections.

SEINE TECH Partners

We have been designing, supplying, installing and commissioning solar water pump systems since 2009. From small-scale systems for drinking water to large irrigation systems for more than 100Ha. Reliable engineering. **GO SOLAR!**

Seine Tech SL. C/Alemania 58, 08700 Igualada, Spain. +34 938050311

Use of first quality brand components. Manufacturer's warranty

MPPT control integrated, specifically designed for solar pump applications.

Durable components

HIGH efficiency

Use of Standard AC pumps up to 37kW, either submersible or surface.

Friendly TECH

Surprising!

Specific design for every pumping station needs

Different power-supply options: Solar, AC-grid or genset, and hybrid
